# Twitec in the UK & Ireland

## Reference Projects

Twitec Architectural Glass. The Spanish high-performance glass manufacturer supplies its products for a large number of singular constructions in the UK, many of them located in London.

Twitec is one of the largest suppliers of glass for residential and office buildings in the UK. At the moment the company participates in almost fifty projects for the most important construction companies and facade developers.

Twitec manufactures tempered, laminated, insulating and printed glass. It is one of the few industries in Europe with capacity to produce insulating glass up to 12 meters (mega-jumbos).

Discover some of our major works completed or in progress in the UK and Ireland.

## VERY SPECIAL

Tvitec is a young company, founded in Spain in 2008, but its lead managers have extensive experience and knowledge in the glass industry. Our projects are present in the most emblematic global construction projects on all five continents. We develop innovative glazing materials for façades, windows, interiors, skylights and floors. Our manufacturing activities include tempering, lamination, screen-printing, double and triple glazing that incorporate coatings which mitigate the transmission of heat, light and sound while maximizing natural light.

OWEN TOWERS. MANCHESTER.

When a construction company chooses Tvitec's glass solutions, it is making a decision that not only will help protect our environment today... but also our future generations environment.

### TVITEC WORLD

Our headquarters are located in Cubillos del Sil (León), in the Northwest of Spain. Here are just some of the construction benefits that you will find working with Tvitec World.

### BENEFITS

- Safety and endurance
- Energy savings and efficiency
- Luminosity and user comfort
- Sustainability
- Style and elegance

We work with all global glass manufacturers. With the help of specialized professionals in our Technical Department, the client can choose the best and most exclusive product for each project.

## OUR SOCIAL COMMITMENT

### COLLABORATION AND DIALOGUE

At Tvitec, we are concerned about trying to turn economic wealth into the most disadvantaged social groups. Throughout the year we carry out actions (CSR) to support charities such as food banks or organizations that seek the integration of marginalized people.

Our employees take part in donation campaigns or sports events aimed at raising funds for those most disadvantaged people.

We also bet on dialogue and collaboration with public bodies, universities and other local teaching centers. We are concerned about the education and training of new generations.
